Generated 2026-10-04 18:16:39 UTC

Executive assessment

Open investigation; no final analyst conclusion recorded.

Same observed source/target, sensor/interface/VLAN and origin/run; activity gap <=300s. No device/person identity or causality asserted.

Observed scope	Value
Source → destination	10.77.0.2 → 203.0.113.20
Sensor / interface	local / fixture
Run	3785b217-355f-4265-85d5-5230d4ac2d24
First / last observed	2023-11-14 22:13:20 UTC / 2023-11-14 22:17:50 UTC

Observed evidence

New external destination observation

NS-EGRESS-NEW v2.0.0 / severity LOW / confidence indicator / status OPEN

First external destination in bounded process/run state. Observation, not maliciousness.

```
{"baseline": "First observed in bounded process/run memory", "observed": 1, "threshold": 1, "unit": "first connection", "window_seconds": 3600}
```

Occurrences: 1

Periodic outbound beaconing indicator

NS-BEHAVIOR-BEACON v2.0.0 / severity MEDIUM / confidence indicator / status OPEN

At least eight outbound initial connections; mean interval >=2s, coefficient of variation <=0.10. Scheduled automation may match.

```
{"intervals": [30.0, 30.0, 30.0, 30.0, 30.0, 30.0, 30.0, 30.0, 30.0], "jitter_coefficient": 0.0, "mean_interval": 30.0, "median_interval": 30.0, "observed": 10, "threshold": 8, "unit": "connection observations", "window_seconds": 3600}
```

Response and verification

No verified live enforcement is present in this evidence snapshot.

Analyst notes

No analyst notes recorded.

Coverage and limitations

Network metadata indicators do not establish compromise or operator identity.

No payloads, credentials or decrypted HTTPS content are included.

Replay and isolated-lab evidence cannot authorize live firewall changes.

Historical records may have expired under retention policy; export is bounded.
